## ALL ABOUT THE MONEY IN TOURISM AND TRAVELLING VOCABULARY

# Marin Cristina- Gabriela Lecturer, PhD., University of Craiova

Abstract: This article aims to explore "phraseology of tourism and travelling". Firstly, a large amount of authentic material are collected from official tourism websites of Britain and the U.S., travelling blogs or online newspapers and magazines. Lastly, it is hoped that the research could enrich the English for Tourism and Travelling and promote the translation of the tourism English vocabulary. At the same time a corpus has been widely employed in the study of practical problems. The results of this study on one hand will contribute to the translation of English for Tourism and travelling, and on the other hand are helpful for students to learn tourism English.

Keywords: vocabulary, practical direction, online sources, actual use, travel-related situations.

### 1. Introduction:

Nowadays, the role of English is important for tourism industry as a means to communicate, negotiate and execute transactions with tourists and tourism employees. The students need to be aware of currently used specialised vocabulary in their field of study. They are supposed to pursue international careers in travel and tourism and therefore, they need to be aware of currently used specialised English travel and tourism vocabulary and their stylistic variation. Studying the language used in tourism websites, video clips, radio programmes, favourite online sites or blogs improves their command of currently used English for tourism and travelling. I have been teaching English for tourism using online sources since 2015.

As Barlow <sup>1</sup> emphasizes English for Specific Purposes teachers can enormously benefit from the application of the corpus-based approach in 3 main areas:

- syllabus design ( to meet students' needs; what language items should be taught)
- materials development (creating material based on real life examples in order to reveal the actual language use)
- $\bullet$  classroom activities ( students themselves can use incorpora and increase their autonomy).

Frequency worlists can help students as well as teachers to discover useful phrases, idioms and collocations.

## 2. Practical direction

<sup>1</sup>Barlow M (2002) Corpora, Concordancing and Language Teaching. Proceedings of the 2002 KAMALLInternational Conference 2002, p.135-141.

**Arhipelag XXI Press**

- money burns a hole in your pocket- bani pe care eşti dornic sã-i cheltui rapid pe lucruri extravagante
- to suit every pocket- preţuri acceptabile, pe care şi le pot permite majoritatea turiştilor
- 3. Conclusion

The outcome of this research is a list of the most frequently used words, phrases and expressions related to money as they appear in the above mentioned sources. Having these goals as a background this article attempts to be a useful tool for students and teachers of English, both at university level and for English as a second language as well as for anyone interested in the vocabulary used Tourism and travelling. Communication skills are an important element of tourism industry. Good English communication during study will add value to students' education. During the past 20 years the explosion in communication technology has revolutionized the field of English language teaching and has shifted the attention the attention from teaching English for academic purposes to teaching English for more speacialized purposes.
