-RE	'long' infinitive suffix
SĂ/ȘI <sub>SUBJ</sub>	freestanding subjunctive marker
-Ș(I)	bound enclitic intensifier

### 3 Glossing conventions; symbols used in examples

-	separates morphs and the corresponding glosses (used in morph-by-morph segmentation)
.	separates multiple glosses of a single morph or word form (used when morph-by-morph segmentation is not necessary); separates syllables
<>	in examples, the segments reconstituted by editors
=	separates a clitic from its host
≡	equivalent; marks syncretism (nom≡acc indicates that the nominative form is syncretic with the accusative form)
≠	different
/	choice/optionality
//	ambiguous interpretation; variation
—	(marks the) ellipsis of the copula in subject(ive) predicative constructions
√	(marks a) null constituent
Ø	null argument; zero inflectional ending; the negative term of an alternation
[e]	empty position
t	trace (of movement)
*	unattested or ungrammatical example
