

THE ENGLISH SLANG TERMINOLOGY RELATED TO BIRDS AND INSECTS

Corina Mihaela Geană
Assist., PhD., University of Craiova

Abstract: Our article aims at focusing on words or phrases belonging to the slang linguistic compartment, which is a section less approached by linguists, precisely because of its moral character, since the slang expressions designate some intriguing aspects of language that might seem filthy or vulgar. The English language has a vocabulary at least as plentiful as the Romanian language, therefore, if the long list of the English synonyms for a certain slang word were translated through one and the same filthy expression, the Romanian reader would be deprived of the contact with the lexical abundance and figurative imaginativeness of the Romanian language. The slang expressions related to birds and insects are numberless, as for almost each and every bird or insect we can find a figurative connotation that gives rise to a slang phrase.

Keywords: bird, insect, slang, derivative, synonym.

In this article we will reveal to what extent the slang expressions and their compounds or derivatives related to birds and insects have made their mark not only in the British English but also in the other Anglophone countries – The American English, the English spoken in Canada, Australia, New Zealand or South Africa. The headwords are given in alphabetical order and they are written in capital letters, while the slang words or expressions connected with them are placed in italics. Unless a word is used in all parts of the English-speaking world, the country of origin or the country in which the word is most prevalent is given between brackets. If a certain slang word or expression has more than one meaning, the meanings are all listed and separated by semicolons. If a word or phrase is used, with different meanings, in more than one country, the meanings are numbered: e.g. 1. (American English); 2. (British English). We have had as a reference book, among others, Volceanov's, Nicolae's and P. Volceanov's "*Dicționar de argou englez- român*"¹. Here are some examples:

ANT / ANTS:

- *(to) have ants in one's pants* (American English) = (to) be on the anxious seat, (to) be agitated;
- *(to) white ant* = to denigrate, to throw dirt at somebody;
- *white ants* (Australian English) = madness, deliration.

BEE / BEES:

- *bee* (American English) = an insignificant dose of marijuana;
- *bee bites* (American English) = marks of the pricks which are let by the drug injections;
- *bees* = cheese, collateral, cabbage (all used as slang words related to *money*);
- *bee-stings* (American English, humorous) = small-sized breasts;
- *beeswax* = 1. (American English) business, matter, deal; 2. (British English, humorous) a tax rate;
- *bees winger* (British English, humorous) = forks, hooks (used as slang words related to *fingers*);
- *bumblebees* = amphetamine;

¹ Volceanov, George, Nicolae, Raluca, Volceanov, Paul George, *Dicționar de argou englez- român*, Niculescu Publishing House, Bucharest, 2015

- *busy bee* (British English) = an angel, bad grass (used as slang expressions related to a kind of animal tranquilizer);
- *killer bees* (American English) = legal advisers used by a certain company in its attempt to take over another company;

- *turkey* = thickhead, gawk; off-grade drugs; withdrawal.

WASP:

- *WASP* (American English, deprecatory meaning) = a white Anglo-Saxon Protestant;
- *wasp* (British English) = traffic warden.

Our article has tried to highlight, as we have seen so far, that the slang words or expressions connected with birds or insects are numerous and extremely suggestive and innovative. A great number of the slang expressions, which are used figuratively, are taken from the animalist universe and they are so frequently used that we can talk about some "publicistic hackneyed expressions" which spontaneously expand into real metaphoric series². In recent years, the most frequently invoked names of birds or insects are: *the bird* (used to designate a light woman, a prostitute), *the pigeon* (used to refer to a fool, a person good for nothing or to a leaker, a whistleblower), *the goose* (used to designate a fool, a gullible person), *the canary* (used to refer to a leaker, a whistleblower), *the dove* (used to mean an attractive young woman), *the grasshopper* (used to mean a leaker, a whistleblower or a cop, a police officer), *the lady-bird* (used to refer to a vicious man or woman), *the hen* (used to designate a female partner, a consort). As it can easily be seen, most of the feminine forms of certain nouns which denote names of different birds are used as slang words to designate a light woman, a prostitute. This is a logical association between the females of different species of birds and the female (either a girl or a woman) of the human race. On the other hand, the masculine forms of the nouns which denote names of different birds are used as slang words to refer to a police officer or to a leaker, a whistleblower.

The linguistic imaginativeness characteristic of the users of the slang expressions prefers the associations and resemblances to objects that belong to the material world. This is precisely the reason for which the semantic fields in which the slang metaphors are

² Zafiu, Rodica, *Diversitatea stilistică în româna actuală*, The University of Bucharest Publishing House, Bucharest, 2001, p. 57.

functioning belong to the human relations, the inanimate nature or to the animal world and the world of birds and insects. The similarities between the human universe and the universe of certain creatures are numberless when we refer to the slang register. Thus, the ways of behavior of the people in comparison with those of the animal world are subject to irony. Animal metaphors are deprecatingly used when they refer to human flaws. It is difficult to distinguish between the slang register and the vulgar tongue, in which, among the most contemptible flaws, one can also mention: stupidity, prostitution, the incapacity of keeping a secret, etc.
